# Software Release Notes

## MMS Version 12.3.1

---

**MMS Version 12.3.1**  
**Revision 7.2024**

## RELEASE NOTES

REVCORD diligently works to improve the most innovative and advanced multimedia logging solution on the market today. Its goal is to provide the marketplace's most robust, scalable, and feature-rich call logger.

Below are the newest features added to the REVCORD software for release version 12.3.1

### New Features for IQ3 Enterprise

1. Integration with Customer database and the use of their records with a unique asset ID.
2. Photo markup - a simple photo editing tool while adding picture BM.
3. OTP based on Login.
4. List inspection
5. Ability to Flag a Bookmark (BM).
6. Ability to set email/SMS-based alerts based on Flag selection.
7. Multiple picture support for a single BM with a maximum of 4 pictures allowed per BM.
8. Video Inspection BM UI overhaul.
9. Search Filters for the BM.
10. Tiny URL integration for IQ3 and RVI invites.
11. Video BM with a limit of a maximum of 60 seconds per event.
12. Report overhaul with customized reporting.
13. Ability to switch between IP cameras while performing an inspection.
14. Auto-save Markers
15. Option to set a template to be used in either list or video or both inspection types.
16. Option to set a template section as mandatory for inspections.
17. Ability to add an event to a repository in MMS when creating the IQ3 inspection.

### New Features for MMS Voice Logging

1. Speech-to-Text for new calls with MMS v12.3.1. Historical calls require a RevSync subscription.
